**IF IT DOESN'T SAY
BUSH HOG®
IT JUST WON'T CUT IT™**

Multi-Spindle Rotary Cutters

Bush Hog® was founded in 1951 when three local Selma, Alabama businessmen collaborated on a new and innovative device designed to clear pasture and crop residue. While being demonstrated to a group of farmers near Selma, and as they watched the ease at which the tractor-pulled implement devoured heavy brush, an elderly gentleman wearing worn overalls stepped forward and said, "That thing eats bushes like a hog!"

Bush Hog®, Inc.
2501 Griffin Avenue
Selma, AL 36703, USA

(800) 363-6096

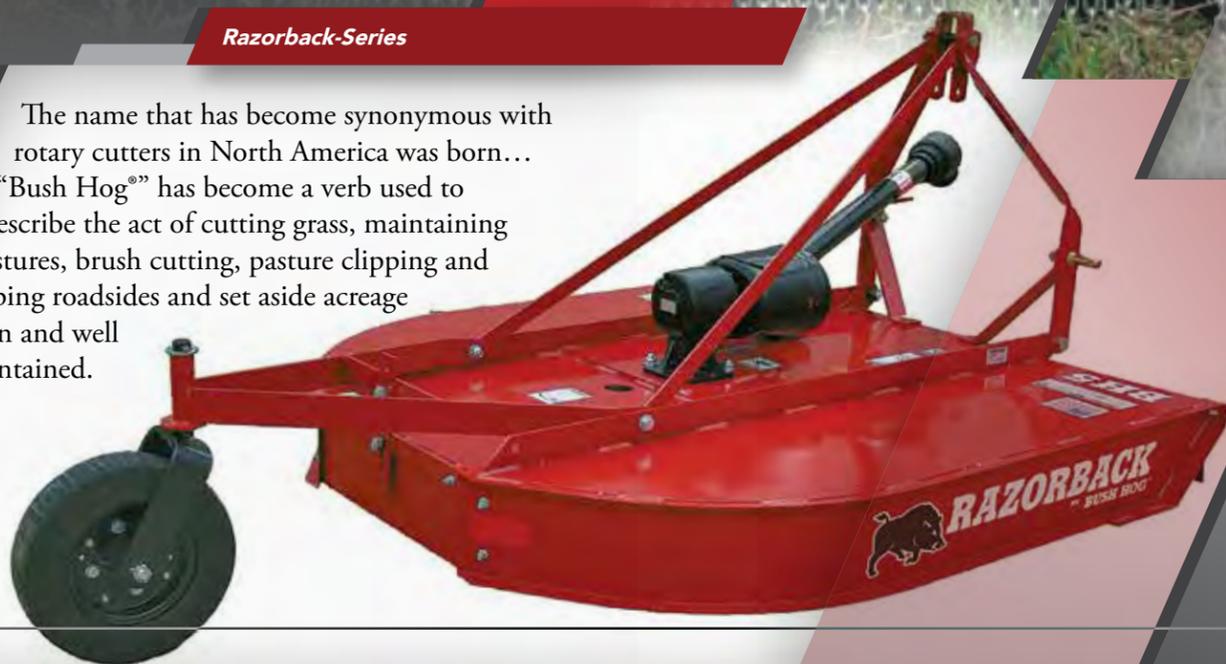

Flex-Wing Rotary Cutter

Bush Hog's® customer base is a split between commercial farmers, hobby farmers, and residential and commercial businesses that have mowing as a primary or secondary function of their business. This market is served by a well-established network of dealers throughout the United States and Canada. Our territory managers use their years of application and market knowledge to select and train the best dealers in their respective area to provide superior products and service to the local customer base.

Razorback-Series

The name that has become synonymous with rotary cutters in North America was born... "Bush Hog" has become a verb used to describe the act of cutting grass, maintaining pastures, brush cutting, pasture clipping and keeping roadsides and set aside acreage clean and well maintained.

Heavy Duty Zero Turn Mowers

From a simple, single spindle rotary cutter in 1951, Bush Hog® today offers a full line of rotary cutters from 4-feet to 20-feet in width to handle the needs of a homeowner with acreage up to the largest rancher or the commercial mowing contractor. In addition to the full line of rotary cutters, Bush Hog® also offers the HD ZT series zero turn mower line along with a full complement of finishing mowers, landscape tools, tillers, hay equipment, post hole diggers and snow blowing equipment.

Established 1962

...durable & dependable products that would last for generations.

EVEREST EQUIPMENT CO.

HEAVY-DUTY SNOW & ICE CONTROL

Custom Forms

For snow and ice products, Everest® utilizes a distributor network to serve the snow-belt areas of the US from Maine to Washington State and throughout Canada. 90% of sales are into the municipal sector, with the remaining 10% to snow contractors in the northeast US and throughout Canada.

Heavy Duty Snow and Ice Control

Everest® Equipment Company designs and manufactures the most comprehensive range of top-quality snow removal and ice control products in the industry, backed by the industry's strongest dealer network, to help our customers maintain safe and efficient roads.

The Company's products are at the forefront of snow removal equipment technology.

A Strong & Reliable Partner

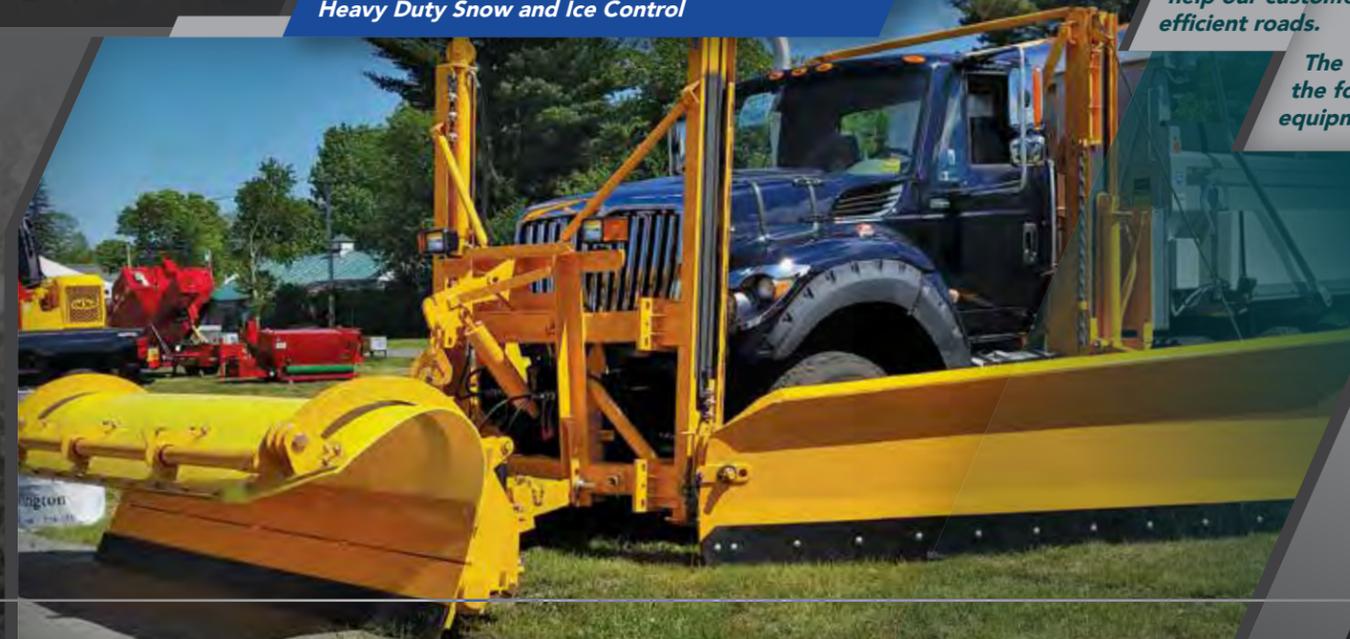

Established 1974

Everest® Equipment Company was established in 1974 as a custom concrete forms manufacturer, providing heavy duty cast-in-place steel formwork for tunnel and shaft infrastructure work such as vehicular tunnels, water supply and storm water drainage, mass transit and service tunnels plus access shaft forms.

In 1984 Everest® added heavy-duty snow and ice handling equipment to its product line as a complimentary product to the custom forms with regards to manufacturing.

NITEHAWK
SWEEPERS

Powerful, Silent & Efficient.

Quieter,
Longer Lasting,
Fuel Efficient
& Eco-Friendly

NiteHawk Raptor™ II

NiteHawk® Osprey™ II

NiteHawk® Raptor™ II

There is simply nothing else like it. Our sweepers are the most fuel efficient and quietest ever built. NiteHawk's® leading models, the 5 cubic yard Raptor™ II and the 3 cubic yard Osprey™ II, are backed by the longest warranties in the industry.

Our sweepers operate daily in governments, municipalities, private contract work, universities, hospitals, and many others applications. A NiteHawk® is the best mid-size sweeper available, built to leverage the hydraulic advantage: quiet, long lasting, easy to maintain, fuel efficient, and remarkably eco-friendly. NiteHawk® Raptor™ and Osprey™ models are ideal for a variety of applications, including roads, parking lots, paths, docks, fairgrounds, event centers, industrial parks, parking garages, and airport grounds.

Established 1985

NiteHawk® designs and manufactures hydraulic sweepers. Our sweepers are engineered to perform in the most diverse operating environments. 35 years of inspired design and field testing have culminated in the best-in-class sweeping performance of the Raptor™ II and Osprey™ II. The advanced hydraulic system has the power to sweep anything you throw in front of it. Reliable quiet operation lets you clean where no other sweeper can.

The Rhino Flex-Wing Family

The Beast of the Rhino Flex-Wing family is the 4155.

RhinoAg® equipment is used in agricultural, commercial, and industrial mowing applications. RhinoAg® products are used to clear brush, maintain pastures and farmland, shred crops and other hobby applications.

Rhino Rear Blades

These blades are so tough we've had to stand by the old adage of "if it ain't broke, don't fix it"—because there is only one way to make an indestructible rear blade.

Ranges from 10' to 20' cutting widths: a size for every application.

RhinoAg® TW Series single spindles are built with heavy-duty tailwheels to keep you cutting like a champ.

Quality you expect, durability we guarantee.

TS12

RhinoAg's® customer base ranges from the local hobby farmer all the way up to government entities that maintain roadways.

We have an experienced team of territory sales managers, a technical service team that's ready to hit the road and get you back up and running, and an internal support staff that's dedicated to taking care of our customers. RhinoAg® is with you for the life of the product.

Turnkey Fleets

...strong presence in Canada and United States through its **multiple locations and large dealer network.**

Tenco® is specialized in fast delivery of turnkey truck fleets, up fitted with a selection of snow and ice removal equipment tailored to specific customer needs. This solution ensures a complete compatibility between cab chassis and mounted equipment for optimal performance and reliability.

The company has a strong presence in Canada and United States through its multiple locations and its large dealer network. In addition to the main manufacturing and installation facilities in St-Valérien-de-Milton, Tenco® possesses two US locations in Barre, Vermont and Lakeville, New York where they provide truck up fitting as well as parts and service support. The company also has a parts depot in Montreal area, Quebec and a parts and service center in greater Toronto, Ontario.

Vegetation Management

WildKat™

Serving Municipal & State Governments.

RailKut®

Saber™ Boom with 60-in Rotary

Bengal™ Boom with 50 in Rotary

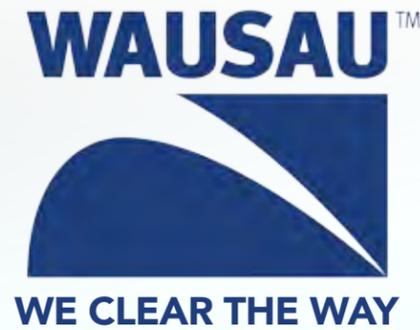

Manufacturing durable rotary and flail boom mowers, side mowers and rear mowing equipment.

A leader of industrial mowing equipment throughout North America for over 50 years.

Established 1968

The Tyler Runwar De-Icer is used to apply de-icing and anti-icing chemicals to runway and taxi way pavement.

Heavy-Duty Snow Removal and Ice-Control Equipment

Wausau™ manufactures severe service, purpose built snow removal chassis under the SnoDozer® brand. Additional brands include: Blue Max runway plows, HomeSafe street plows, Turboblast high velocity air blowers, Tyler liquid de-icers and SnoGo rotary snow blowers.

Truck Mounted SnoGo Snow Blower

Wausau™ manufactures its products at its fabrication facility located in New Berlin, Wisconsin. Final assembly of airport and rail products takes place at the Fond Du Lac assembly plant. All Wausau™ facilities have implemented ISO 9001:2015 certified quality mgmt. systems.

SnoDozer® is a severe-duty chassis designed for high performance snow removal at airports and highway departments. Whether plowing, blowing or brooming, the chassis offers superior strength, toughness and visibility to handle the challenges of high-speed airport and highway snow removal. Highway departments depend upon SnoDozer's® traction and power to keep mountain passes open.

Established 1978

Wausau™ Equipment Company, Inc. is a leading manufacturer of heavy-duty snow removal and ice-control equipment for the municipal, airport, defense and rail markets. Products include heavy-duty snowplows, hitches and wing systems, rotary brooms, loader- and truck-mounted snow blowers, spray deicing systems and high-velocity air movers.
